

CONFLICT MINERALS STATEMENT

To Our Valued Customer:

U.S. federal legislation regarding “conflict minerals” continues to affect manufacturing industries. Under Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank Act”), manufacturers who file certain reports with the Securities and Exchange Commission (SEC) are required to disclose whether the products they manufacture or contract to manufacture contain “conflict minerals” that are “necessary to the functionality or production” of those products. The Dodd-Frank Act resulted from concerns that revenues obtained from mining and transport of conflict minerals are being used to finance ongoing conflict in the Democratic Republic of Congo and surrounding countries and may be aiding human rights abuse.

Conflict minerals refers to gold as well as tin, tantalum, and tungsten, the derivatives of cassiterite, columbite-tantalite, and wolframite, regardless of where they are sourced, processed or sold.

Anchor-Harvey is committed to the promotion of human rights and supports the goals of the Dodd-Frank Act which aims to prevent the use of conflict minerals. As an aluminum forging company, Anchor-Harvey does not purchase any materials which are classified as a conflict mineral.

Anchor-Harvey certifies that the forged aluminum products we supply do not contain any tin, tantalum, tungsten or gold. We do not alter the chemical composition of the products in any way, and the use of these minerals is not necessary to the production of our products.
