

PFAS DECLARATION
(PER- AND POLYFLUOROALKYL SUBSTANCES)

Anchor Harvey certifies that its products have been reviewed and, to the best of Anchor Harvey's knowledge, are in compliance with applicable U.S. Environmental Protection Agency (EPA) regulatory definitions of Per- and Polyfluoroalkyl Substances (PFAS) under the Toxic Substances Control Act (TSCA) Section 8(a)(7) and 40 CFR Part 705.

In preparing this Declaration, Anchor Harvey has reviewed information provided by its raw material suppliers, examined the chemical compositions of the aluminum alloys used in its operations, and evaluated its own manufacturing processes. Anchor Harvey does not intentionally add PFAS to its products, and based on supplier data and internal process assessments, Anchor Harvey has no knowledge that PFAS are present in the materials or articles it manufactures or supplies.

Based on the information reasonably obtainable through normal business practices — including Safety Data Sheets, supplier declarations, and knowledge of manufacturing processes — Anchor Harvey confirms that its products have no intentional addition of PFAS, including but not limited to:

- Perfluorooctane sulfonic acid (PFOS) and related compounds
- Perfluorooctanoic acid (PFOA) and related compounds
- Perfluorohexane sulfonic acid (PFHxS) and related compounds
- Other substances meeting the PFAS definition under 40 CFR 705 (e.g., containing a fully fluorinated CF_2/CF_3 carbon)

Anchor Harvey believes, to the best of its knowledge, that the above statements are accurate. Anchor Harvey will endeavor to update or modify this PFAS Declaration should any changes occur in the composition of its products, its supplier information, or relevant PFAS regulatory requirements.
